| Suction Fittings Angle   | N/A                                                                                                                          |
| Bypass Valve - BPV       | N/A                                                                                                                          |
| Bypass Valve Kit         | N/A                                                                                                                          |
| Displacement             | 102.9 - [cm3/rev]                                                                                                            |
| Rotation                 | N/A                                                                                                                          |
| Flow                     | N/A                                                                                                                          |
| Operating Pressure       | 350 - [bar]                                                                                                                  |
| Shaft Speed              | 1800 - [rpm]                                                                                                                 |

Flange/shaft:  
PTO coupling ISO 7653 - D

Drain port:  
ISO 1179-1 - G 1/2

Main port A:  
ISO 1179-1 - G 1

Main port B:  
ISO 1179-1 - G 1

For performance data, dimensions and deviations from standards, see catalog.

**Disclaimer:**

Parker PMDE has a continuous policy of product development and although the Company reserves the right to change specifications, it attempts to keep customers informed of any alterations. This publication is for general information only and customers are requested to contact their local Parker dealer for detailed information and advice on a products suitability for specific applications. All products are sold subject to the company's Standard conditions of sale.
