

asa rail connector BSP1 1/4"

The asa rail system is the first worldwide flexible mounting and connection system for air blast heat exchangers. The flexibility comes from free choice of the port's direction. Each port on the radiator has 3 possibilities. This well designed radiator concept brings another flexibility innovation hit to the standard cooler market: The oil flow direction can be chosen between u-flow direction and diagonal oil flow on each TT rail cooler!

order number	ILLZSET5G32
--------------	-------------

Suitable for the cooler

AC-Motor	DC-Motor	Hydraulic-Motor
TT 05 compact	TT 05 12/24V DC	TT 11 hydraulic drive
TT 07 AC	TT 07 12/24V DC	TT 16 hydraulic drive
TT 07 compact	TT 11 12/24V DC	TT 25 hydraulic drive
TT 11 AC	TT 13 12/24V DC	TT 36 hydraulic drive
TT 11 compact	TT 16 12/24V DC	
TT 13 compact	TT 20 12/24V DC	
TT 16 AC	TT 21 12/24V DC	
TT 16 compact	TT 25 12/24V DC	
TT 21 AC	TT 36 12/24V DC	
TT 25 AC	TT 40 12/24V DC	
TT 36 AC	TT 30 12/24V DC
